Skylab Progress Report, June 1975

A Lake and Sea Ice Experiment with Skylab Microwave Radiometry

Tapes for the S193 scatterometer/radiometer were received by this office, although a request was made that they be sent directly to the Remote Sensing Center, Texas A&M University. This office sent them to Texas A&M for processing to a form usable by the investigators. The Remote Sensing Center has informed us that they are having a great deal of difficulty with the tapes. They have been referred to the correct persons at NASA-JSC to discuss their problems and will be working closely with NASA-JSC in preparing the tapes for data study. In the meantime, work with other data continues.
